API Testing with Onb... #Onboarding-Agent Help me test an API I'm working with.

1. Send a request and look at the response
2. Write a test script to validate the response automatically
3. Run the collection to execute all tests at once

Let's start with step 1 — sending the Get data request to see what comes back. Ready to go?

What would you like to do next?

- Send the Get data request
- Write tests for my requests
- Run the whole collection

Describe what you need. Press @ for context.
